

THINK

Distressing change in handwriting.

Efficient removal of glitch.

Will it be expensive?

Will it be effective?

Overwhelmed by manual recognition.

Happy about time saving softwares.

Frustration with difficulties in understanding handwriting

FEEL

Glitch in software.

Easy communication to user.

Lack of professional to understand the novel method.

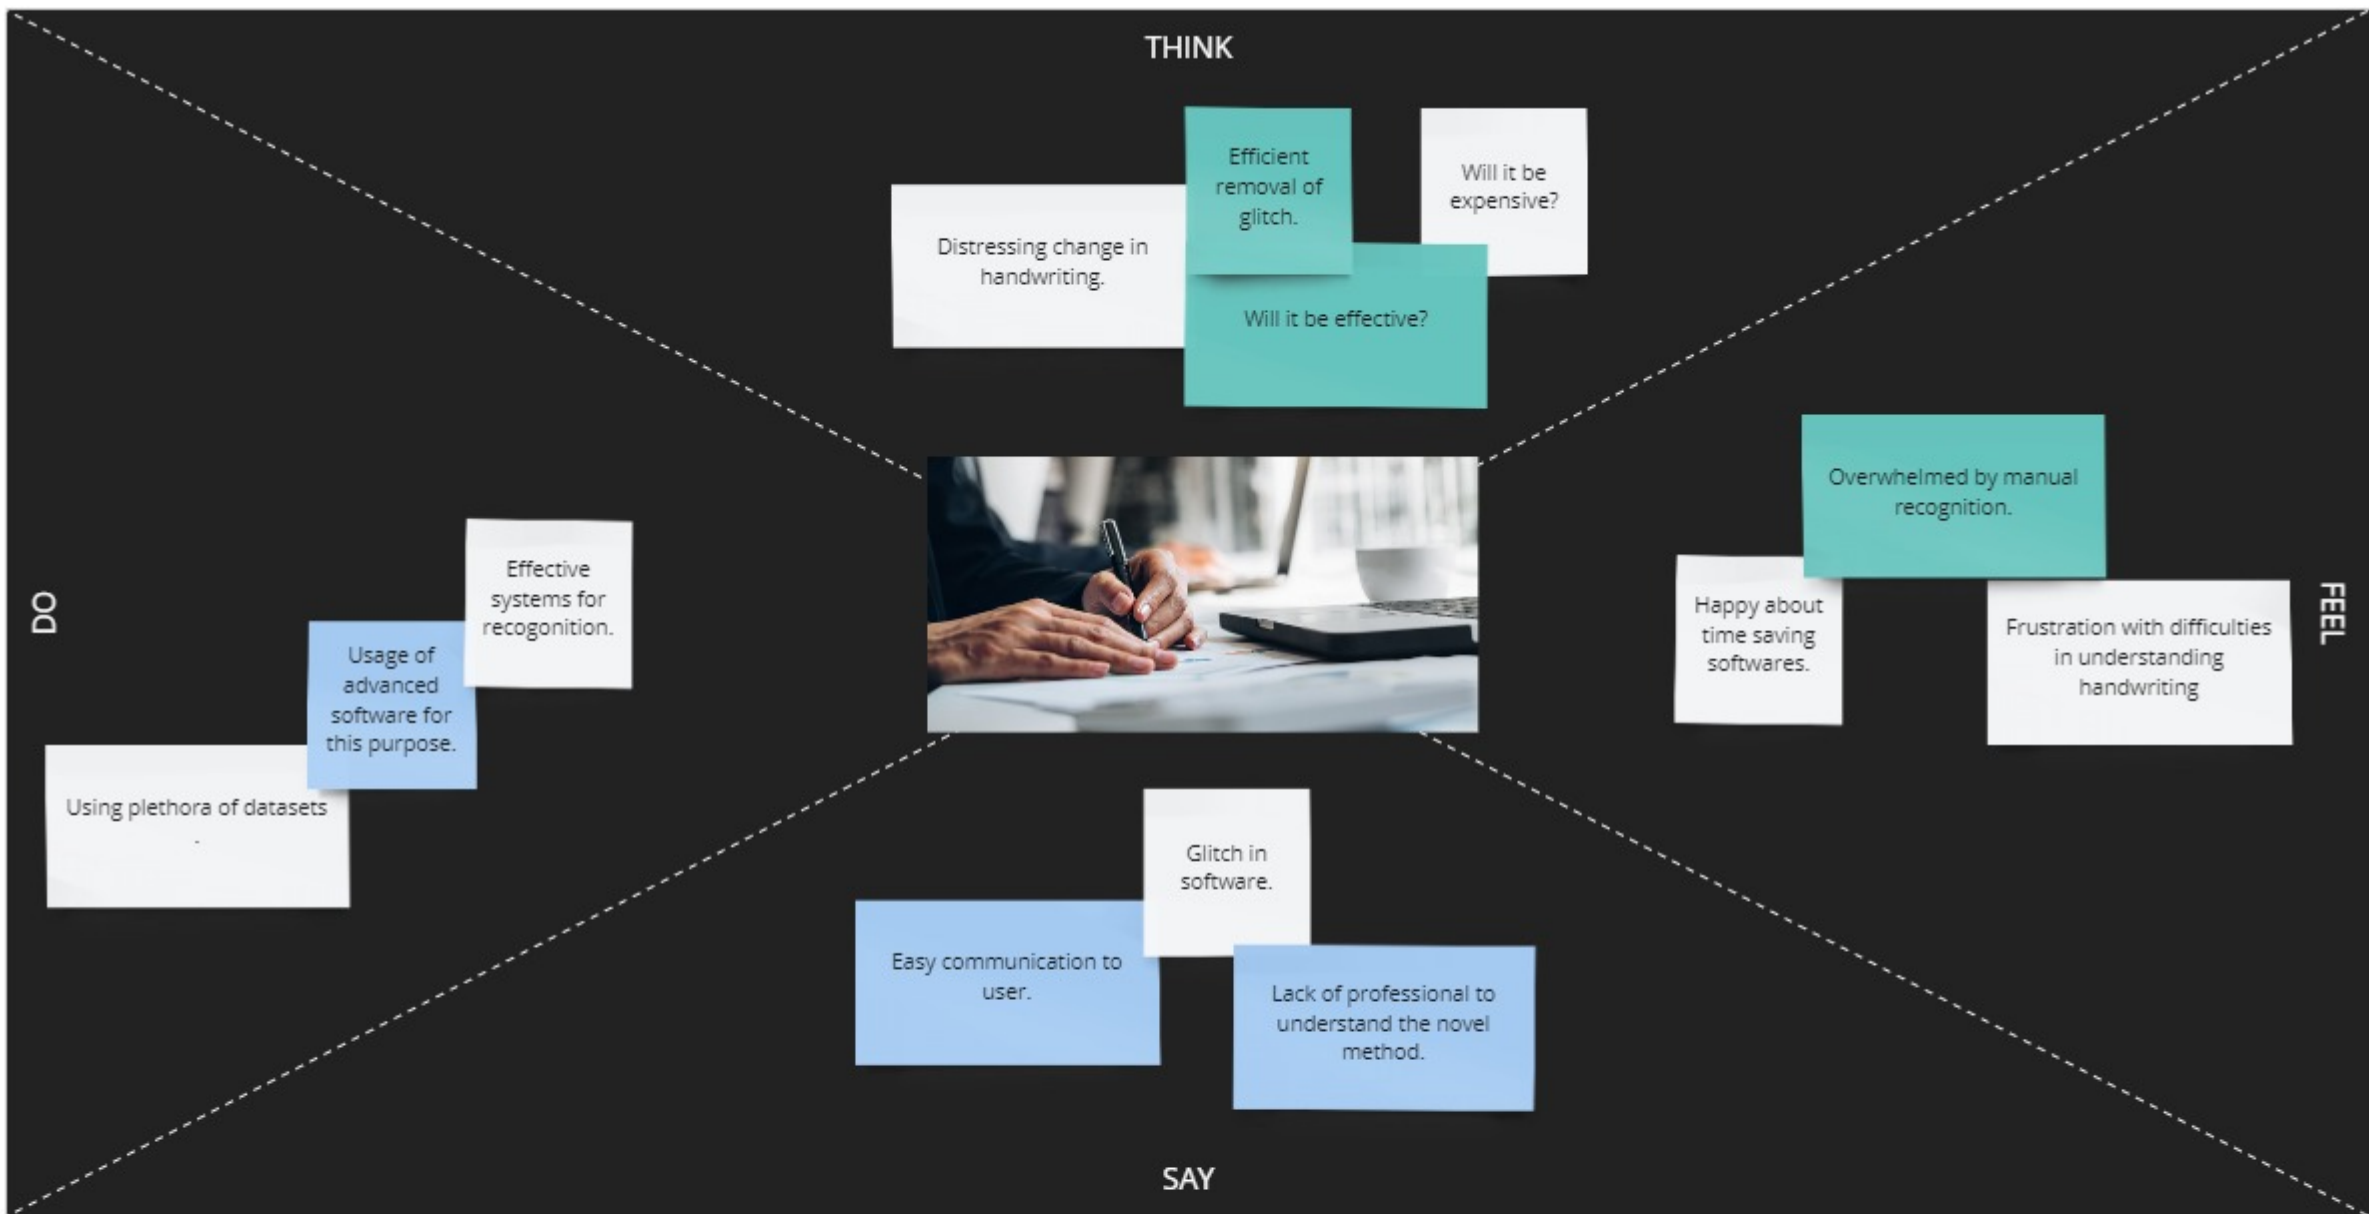

SAY

Effective systems for recognition.

Usage of advanced software for this purpose.

Using plethora of datasets

DO

Pain

1. Inefficient usage of software
2. Difficulty in navigation
3. Absence of skill to use technology

Gain

1. Efficient method to understand handwriting
2. Consumes time
3. Faster technology
